

TL/800

carrello transpallet a grande alzata manuale

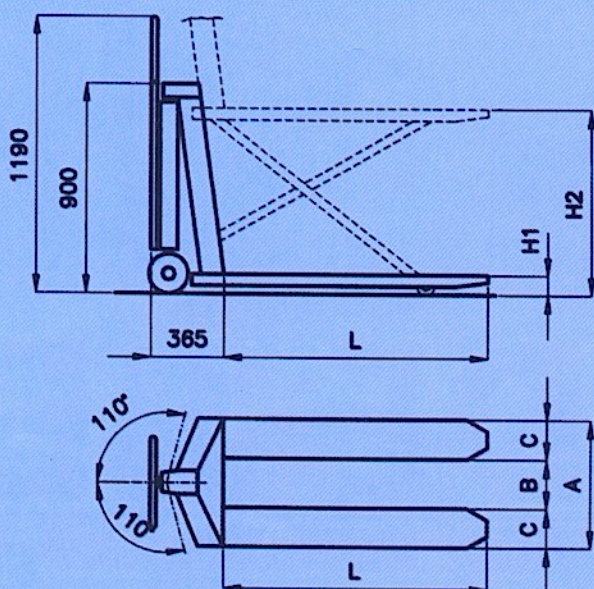

Constructed throughout in stainless steel AISI 304, it offers the same technical and construction features as the previous models, while being able to raise the load up to 800 mm above the ground.

To ensure load stability and safety, the truck is fitted with outrigger rollers which are lowered to the ground as soon as the load reaches 400 mm above the floor.

manual high-lifting pallet truck

Constructed throughout in stainless steel AISI 304, it offers the same technical and construction features as the previous models, while being able to raise the load up to 800 mm above the ground.

To ensure load stability and safety, the truck is fitted with outrigger rollers which are lowered to the ground as soon as the load reaches 400 mm above the floor.
